

# Corporate Overview

## ABOUT US

Acadia Technology Group is an IT solution provider operating out of Montclair, NJ. A Cisco partner with decades of experience, Acadia Technology Group is responsible for some of the most cutting-edge internet-of-things and security solutions within the theme park, finance, and legal markets.

We've been successful and built our reputation on client-centered service. We know you want to lead, not imitate. And we know your business objectives drive your network investments.

## CAPABILITIES

### Internet-of-Things

Innovative internet-of-things solutions designed, built, and implemented for organizations. We help companies gain insight, reduce costs, and automate tasks through a connected ecosystem of devices.

### Wireless

Wireless solutions backed by industry-leading performance and advanced technology from Cisco. We help businesses deliver enhanced end-user experience for employees and customers across numerous wireless devices.

### Security

Network security solutions designed to help you meet compliance and stay on the forefront of industry best practices. We help businesses maintain the integrity of their organization, data, brand and systems while reducing maintenance hours for IT professionals.

### Networking

Acadia designs, deploys, manages, secures and troubleshoots converged network solutions. We help automate, simplify and integrate networks to reduce total cost of ownership (TCO) while improving performance and productivity.

### Data Center

Combining software-defined networking and computing power of Cisco UCS with the Cisco HyperFlex HX Data Platform, we help businesses realize the benefits from enhanced simplicity, increased operational efficiency, adaptability, and data storage savings.

### Unified Communications

Unified communications solutions designed to integrate voice and data systems to provide a secure, seamlessly foundation for all business collaboration tools – including voice, e-mail, messaging, web-based document collaboration, mobile apps and high-definition business video.

## IT'S ALL ABOUT YOU

You will never receive a template answer. We'll solve your unique problems with sensible, bespoke solutions, not a hardware checklist or another client's re-worked strategy.

We've delivered bullet-proof solutions to some of the largest corporations and institutions in America. And we bring a legacy of insight, sound judgment and historical perspective to every engagement.

Our employees are some of the most experienced Cisco network and network security consultants in the country. Our senior technical staff has a minimum of 15 years' experience and several have taught Cisco Certified training.

The best part? We're real people using real words, not industry jargon. We're great listeners and great communicators. We stay on top of the latest technologies so you don't have to. And we get the job done right – on time and on budget – the first time out.
